

## Cellular modem specifically designed for Itron® ACE6000, ACE8000 and ACE SL7000 electricity meters

### UPGRADE THE MODEMS NOT THE SMART METERS!

All around the world mobile operators are shutting down 2G/3G networks in order to give way to 5G. Companies that operate smart meters with 2G/3G connectivity must plan the migration to the latest 4G LTE network which is well-positioned to dominate smart metering communication technologies in the upcoming years. The migration from GSM / UMTS to LTE has many advantages, for example, a shorter readout time due to the high-speed network with low latency.

Utilities have two options for migration: replace the meters or upgrade the modems! The 1st option comes with a high CAPEX, while the 2nd option is a future-proof solution that reduces TCO.

This cellular modem represents a future-proof migration solution to the LTE network with the same functionality, on higher data speed. Configuration and firmware updates can be done remotely, minimizing the need for costly site visits. As part of an AMR/AMI solution, the modem provides a stable, transparent connection to the meter through which the HES can pull consumption data from the meter.

Our cellular modem works smoothly and is fully compatible with Itron® ACE6000, ACE8000 and SL7000 electricity meters. The case was designed to fit under the terminal cover of the meter and is fully compliant with Itron standards. It connects to the meter through its RS232 or RS485 connector. The modem can send data by CSData call (2G) also. It can be mounted externally on a DIN-rail. It is fully configurable by our powerful and easy-to-use WM-E Term® software. The ideal solution for remote readout of registers and consumption data of the connected electricity meters.

### MAIN FEATURES

- Module order options:
  - 2G module
  - LTE Cat.4 / 3G / 2G module
  - LTE Cat.1 module with 2G or 3G/2G „fallback” feature
  - LTE Cat.M / Cat.NB module with optional „2G fallback”
- It can be assembled into the meter's enclosure and fastened securely (sealed and separated from meter)
- Compatible with the Itron® ACE6000, ACE8000, SL7000 (3W) electricity meters
- DC power supply from the meter
- RS232 / RS485 transparent data connection (RJ45)
- „Pull” data sending (for HES request), CSData call
- Immediate alarm- and SMS notification
- Supercapacitor (against power outages)
- Remote & safe firmware updates

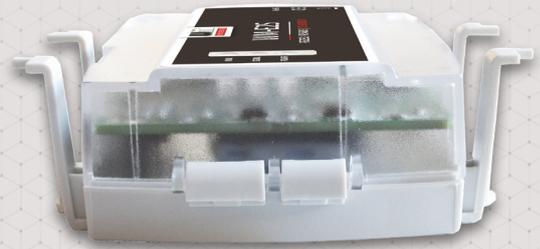

### APPLICATION

- UTILITY COMPANIES
- SMART METERING
- METERING DATA TRANSMISSION TO HES
- INDUSTRIAL MEASUREMENT

## DESIGN AND OUTFIT

- The modem is installable into the meter enclosure
- RS232 or RS485 interface connection (RJ45) - it can be ordered with fixed connection or free-to-jumper outfit
- DC power supply by meter
- Supercapacitor for Last GASP notification
- SMA or FME antenna connector outfit (by order request)

## COMPATIBILITY

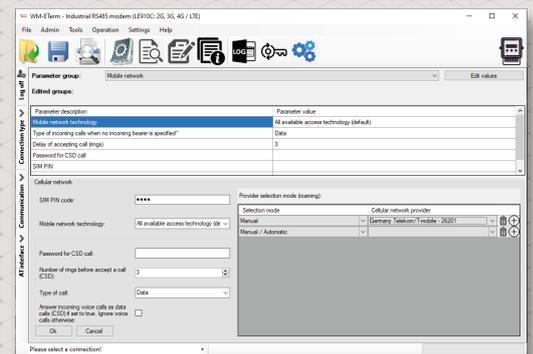

- Itron® ACE6000, ACE8000 and ACE SL7000 meters

## OPERATION

- IEC 62056-21 protocol, transparent data transmission
- „Pull“ data sending (for HES request)
- CSDData call (2G)
- Immediate SMS notification, DCD control

## ACCESSORIES (ORDER OPTION)

- RJ45 cable (for meter connection / configuration)
- Optional SMA / FME antenna (50 Ohm) - upon request
- DIN-rail adapter - for external modem installation
- WM-E Term® software (mass fw updates, actualization of settings)
- You can manage the device by Device Manager® software
